SUMMARY

Computer Engineering graduate with skills in Python, SQL, Web Development, DBMS, and Software Development. Experienced in building web applications and database-driven projects through internships and academic work. Strong understanding of OOP, SDLC, and problem-solving. Seeking opportunities as a Software Engineer or Application Developer.

EDUCATION

B.E, Computer Engineering 2021 – 2025
GSMCOE, Savitribai Phule Pune University (8.75 *GPA*)

Higher Secondary School 2019 – 2021
Jain girls High School,Pune (84%)

SKILLS

Programming Languages: Python, JavaScript, SQL, Django
Web Technologies: HTML, CSS, JavaScript, ReactJS
Core concepts: OOP, DBMS, SDLC, Data Structures & Algorithms
Database: SQL, Joins, Subqueries, Constraints
Machine Learning: Scikit-learn, NLP, TF-IDF, Logistic Regression
Libraries: Pandas, NumPy, Matplotlib, OpenCV
Tools: Git, GitHub, VS Code

EXPERIENCE

Qspiders, Wakad
Python Full Stack Development Intern
- Developed Python-based backend modules and implemented application features using Django and REST APIs.
- Built responsive web interfaces using HTML, CSS, and JavaScript and integrated frontend with backend services.
- Debugged application issues and worked with SQL databases to support reliable application functionality

PROJECTS

Cyberbullying Detection April 2025
Python | Flask | HTML/CSS | TF-IDF | Logistic Regression
- Developed and supported a **Flask-based web application** for real-time text classification and user interaction.
- Implemented backend logic for **handling user inputs, processing requests, and generating prediction results**.
- Performed **debugging and error handling** across frontend and backend components to ensure smooth application functionality.
- Integrated **TF-IDF text processing and a machine learning model** for automated text classification.
- Tested application workflows and resolved functional issues related to **input validation, API requests, and application responses**.

Complaint Tracker System July 2026
Python | Django | SQL | HTML/CSS | JavaScript
- Developed a **Django-based complaint management application** for submitting, tracking, and monitoring user complaints.
- Implemented **user authentication, complaint workflows, and database operations** using Django and SQL.
- Performed **CRUD operations** and handled data validation, updates, and status changes within the application.
- Troubleshot application issues related to **forms, database queries, authentication, and user workflows**.
- Built responsive interfaces and implemented complaint status tracking: **Pending, In Progress, and Resolved**.

CERTIFICATES

- Python FullStack Development - Qspiders
- Google Data Analytics Professional Certificate
- 2025 Tableau Certified Data Analyst - Udemy
